

Company: Thistle Trekking LTD	Description of Work Activity or Area of the Workplace Assessed: The Skye Trail					Compiled by: Scarlet Trevett
	The Skye Trail Risk Assessment					Date completed: February 2013
Location: UK		All RA's should be reviewed if changes are made to the trip, e.g. the group, transport, ratios etc.			Updated/Reviewed: 23.1.2019	
STEP 1	STEP 2	STEP 3		STEP 4		STEP 5
List potential Hazards:	List of people who are at risk from the hazards. Including those most vulnerable:	List of existing measures to manage the hazard or note where information may be found:		Calculation of the residual risk taking the presence and effectiveness of existing measures into account: Severity x Likelihood = Risk Rating		List further control measures necessary to reduce risk to an acceptable level <i>and</i> date of their proposed introduction:
Slipping/ Tripping	All	<ul style="list-style-type: none"> Suitable footwear must be worn where possible. Hazards must be clearly explained to the group. 		1	2	2
Falling	All	<ul style="list-style-type: none"> Provide appropriate supervision where such hazards exist. On the exposed section shortly after leaving Elgol, all customers must be briefed on the severity of a fall in this area. They must not undertake unnecessary tasks, 		3	1	3

Note – Risk Ratings of 4 or more are significant and require further action to control risk

Severity: **1=Slight** (all injuries not defined as major or serious); **2=Serious** (injuries that are not major but are likely to prevent someone working normally for more than 3 days); **3=Major** (death or major injury e.g. fracture of a bone, amputation, serious damage to an eye etc)

Likelihood: **1=Low** (unlikely to happen); **2=Medium** (could well happen); **3=High** (certain or near certain to happen)

		e.g. taking photos, eating food, until after this section. A rest/drink/snack break before this sections starts should be advised.				
Blisters	All	<ul style="list-style-type: none"> • Wear suitable footwear where possible. • Provide advice regarding socks. • Provide advice regarding lacing footwear up properly. 	1	2	2	
Lyme disease From Tick bites	All	<ul style="list-style-type: none"> • When in an area with ticks advise all group members to wear long trousers and or put on an insect repellent. • Provide advice on how to remove them. • Tell participants what the signs and symptoms of Lyme disease are and emphasise that they should to go to the doctor if they appear. 	3	1	3	
Reaction to midge bites	All	<ul style="list-style-type: none"> • Advise everyone to take along an appropriate insect repellent. • Advise everyone to take along a head net when appropriate. 	2	1	2	

Note – Risk Ratings of 4 or more are significant and require further action to control risk

Severity; 1=Slight (all injuries not defined as major or serious); **2=Serious** (injuries that are not major but are likely to prevent someone working normally for more than 3 days); **3=Major** (death or major injury e.g. fracture of a bone, amputation, serious damage to an eye etc)

Likelihood; 1=Low (unlikely to happen); **2=Medium** (could well happen); **3=High** (certain or near certain to happen)

Stomach Upsets from drinking polluted water	All	<ul style="list-style-type: none"> Advise everyone not to drink from any rivers or streams while walking. 	3	1	3	
Sickness from eating wild vegetation.	All	<ul style="list-style-type: none"> Advise everyone not to eat wild berries, mushrooms, flowers or any other wild vegetation. 	3	1	3	
Exhaustion	All	<ul style="list-style-type: none"> Provide opportunities for the participants to eat drink and rest. Where necessary provide shelter. On the Trotternish Ridge the guide must assess the customers' ability for the day and if exhaustion is likely the customer must not be allowed to proceed. 	2	1	2	
Hypothermia	All	<ul style="list-style-type: none"> Use appropriate clothing. Encourage adequate intake of food prior to and during the trip. 	3	1	3	
Sunburn/ eye strain	All	<ul style="list-style-type: none"> Use sun hats/baseball caps. Encourage participants to bring and use an appropriate cream/spray. Drink water at regular intervals. Seek shade where required. Use sunglasses as required. 	1	1	1	
Getting Lost;	Group Members	<ul style="list-style-type: none"> Brief all participants that they must be able to see the guide at all times. If they cannot see the guide they must stop and wait. 	2	1	2	

Note – Risk Ratings of 4 or more are significant and require further action to control risk

Severity: **1=Slight** (all injuries not defined as major or serious); **2=Serious** (injuries that are not major but are likely to prevent someone working normally for more than 3 days); **3=Major** (death or major injury e.g. fracture of a bone, amputation, serious damage to an eye etc)

Likelihood: **1=Low** (unlikely to happen); **2=Medium** (could well happen); **3=High** (certain or near certain to happen)

		<ul style="list-style-type: none"> Brief all participants to take their mobile phone should they decide to ignore the above. Only use remote supervision if it meets all criteria of use in the remote supervision policy. 				
Livestock	All	<ul style="list-style-type: none"> Advice participants to avoid all livestock. Find an alternative route for participants with dogs when reasonable. Advice participants with dogs to release the dog if being chased by livestock. 	3	1	3	
Being hit by a Vehicle	All	<ul style="list-style-type: none"> Advice participants to walk on the right hand side of the road where possible. Warn participants of upcoming roads. Advice participants to be aware when in car parks. 	3	1	3	
Collision with cyclists	All	<ul style="list-style-type: none"> Warn participants of approaching cyclists when visible. Warn participants of well-known cyclist areas. 	2	1	2	
Alcohol Related Injury	Group Members	<ul style="list-style-type: none"> Advice all participants to limit their alcohol intake during the daytime. 	1	1	1	
Lightning	All	<ul style="list-style-type: none"> A weather forecast should be 	3	1	3	

Note – Risk Ratings of 4 or more are significant and require further action to control risk

Severity: **1=Slight** (all injuries not defined as major or serious); **2=Serious** (injuries that are not major but are likely to prevent someone working normally for more than 3 days); **3=Major** (death or major injury e.g. fracture of a bone, amputation, serious damage to an eye etc)

Likelihood: **1=Low** (unlikely to happen); **2=Medium** (could well happen); **3=High** (certain or near certain to happen)

		<p>checked before each day of walking begins to see the risk of lightning.</p> <ul style="list-style-type: none"> • During a high risk of lightening the support vehicle must remain ready for emergency pick up if lightning starts. • If lightening begins which has not been forecast or if the support vehicle is unable to reach the participants for an emergency pick up the leader must follow “The Lightening Procedure”. 				
Snow	All	<ul style="list-style-type: none"> • A weather forecast should be checked before each day of walking begins to see the risk of snow. • If heavy snow is forecast or if the path is covered in deep snow an alternative route must be found. 	2	1	2	
High winds	All	<ul style="list-style-type: none"> • A weather forecast should be checked before each day of walking begins to see the risk of high winds. • If high winds are forecast or develop during the walk care should be taken when walking through forest or wooded areas. 	3	1	3	

Note – Risk Ratings of 4 or more are significant and require further action to control risk

Severity: **1=Slight** (all injuries not defined as major or serious); **2=Serious** (injuries that are not major but are likely to prevent someone working normally for more than 3 days); **3=Major** (death or major injury e.g. fracture of a bone, amputation, serious damage to an eye etc)

Likelihood: **1=Low** (unlikely to happen); **2=Medium** (could well happen); **3=High** (certain or near certain to happen)

		<ul style="list-style-type: none"> Walking should not be attempted during winds of over 60mph. 				
River Crossings/Drowning	All	<ul style="list-style-type: none"> The guide will continually monitor river levels throughout the duration of the walk. River crossing should only be attempted if the river level is below the knee height of all members of the group. The guide must follow the river crossing procedure. 	3	1	3	
Cuts/Injury from crossing Barbed Wire Fences		<ul style="list-style-type: none"> The guide must check fences for barbed wire before letting the group cross over the top. If barbed wire is present the guide should brief the group to be extra careful. If the guide is concerned that the fence cannot be crossed safely then an alternative route should be found. 	2	1	2	

Note – Risk Ratings of 4 or more are significant and require further action to control risk

Severity: **1=Slight** (all injuries not defined as major or serious); **2=Serious** (injuries that are not major but are likely to prevent someone working normally for more than 3 days); **3=Major** (death or major injury e.g. fracture of a bone, amputation, serious damage to an eye etc)

Likelihood: **1=Low** (unlikely to happen); **2=Medium** (could well happen); **3=High** (certain or near certain to happen)
